Portfolio Highlights Over the last 3 Years

Data as of 30 April 2024

Proven Track Record of more than 65 Trade Sales and IPOs in 10 Years

Data as of 30 April 2024

Investment Strategy

Innovation

- Investment focus on companies with innovative platforms and drug candidates

Private and Public

- Portfolio of private and small-cap public companies (generally market capitalisation below USD 2 bn)

Proof of Concept

- Investments typically first made in a venture round when company has product(s) in clinical development and has achieved “proof of concept”

Follow-on

- Subsequently, investment may be increased substantially in follow-on financings, provided the value-creation potential is intact

Active Participation

- Active participation with companies to develop towards trade sale or IPO

Flexibility

- Permanent capital structure provides flexibility to further increase investments at or after the IPO

Investment Approach

Investment Approach

- Fundamental long with private and public healthcare investments
- Bottom-up selection of investments with solid long-term growth potential
- Diversified portfolio approach
- Sourcing of proprietary private deal flow
- Active lead/co-lead investor in private companies with board representation
- HBM takes an active role and assumes entrepreneurial responsibility together with the management team
- Maximum single position limit at time of investment up to 10% of NAV

Private Equity Investment Process

* Deal Flow: 45% USA/Canada, 40% Western Europe, 15% RoW; 60% Biotech, 30% Medtech & Diagnostics, 10% Other

¹ ICM: Regular meeting of all HBM investment professionals including CEO, CFO, Head Private Equity and Risk / Investment Compliance Officer.

Main function: Overall review and discussion of potential new investments and progress of existing investments. Consultative vote on new and follow-on investments.

Public Equity Investment Process

Due Diligence

- Scientific and clinical review: Survey of scientific literature and journals, study of clinical trials and regulatory paths
- Business analysis: Detailed financial modelling and projections for companies, comparison vs market consensus, comparable company analysis
- Assessment of stakeholders and their track record
- Explore patent situation
- Issue investment thesis and rationale

Portfolio & Risk Management

- Survey of general market environment
- Continuous re-evaluation of investment theses and price targets
- Dynamically modify position sizes according to latest assessments
- Strictly stick to portfolio guidelines
- Risk controls through active exposure management and strict position limits

Idea Generation

- Appraisal of scientific, technological, regulatory and political trends
- Universe of >1,500 healthcare companies (approx. 15% are covered by stock market analysts)
- Proprietary database with 750+ companies
- Regular attendance of industry, medical and scientific conferences
- Close relationship to industry, medical experts and C-level executives
- Priority ratings for due diligence assigned

Stock Selection & Portfolio Construction

- Determine exposure and position size
- Investment decision is made by the portfolio manager
- Initiate new position based on risk/reward considerations, investment thesis, time to value inflection point and fit in overall portfolio
- Scale position size according to conviction level
- Portfolio is continuously analysed to identify new investments that offer more attractive opportunities

Healthcare Sector

Attractive Growth Sector with Strong Fundamentals and Drivers

Biotech Outperformed the Market Over Short & Long Term

Source: Bloomberg, data as of 30 April 2024, in USD

- Healthcare sector’s fundamentals remain intact and are supportive for further outperformance
- Sales from drugs and medical devices > \$1.4 trillion p.a. representing more than 25% of the healthcare industry’s total revenues
- Biotech sector resilient to economic cycles with high profit margins, strong cash-flows and highest returns in healthcare
- > 90% of next-generation biotherapeutics (cell-, gene- and nucleotide-therapies) developed by emerging biopharma
- Sustainable market drivers such as ageing population, favorable regulatory environment, greater scientific understanding, and an increasingly affluent middle class
- Market positioned for further upside given attractive valuations, could be complemented by acceleration in M&A

Constructive Environment for Drug Approvals

The US regulator approved record numbers of new drugs in 2023

Number of Approvals per year

Percentage biologics

Largest Private Equity Investments

175

Swixx BioPharma

- Full representation services for pharma/biotech in CEE (Central and Eastern Europe)
- Profitable company with net sales expected to exceed EUR 900m in 2023; targeting to reach low-double digit EBITDA margin; over 1'200 employees and present in 25 countries

51

Neurelis

- Nasal Diazepam (Valtoco®) approved with orphan status in managing breakthrough epilepsy seizures
- USD 100+ net sales in the US, and market leader in the space
- Pipeline of other neurology pipeline assets (novel drugs and generic medicines)

50

Fangzhou (Jianke)

- China's leading B2C SmartCare service platform for chronic diseases management
- Closed strategic cooperation with Santen, Menarini, Zelgen, Novartis, Pfizer and many other pharmaceutical companies
- Sales of CNY2.4b (\$335m) in 2023. Increased Gross/net profit in 2023 vs 2022.

Data as of 31 March 2024, Bookvalue in CHF million

33

Upstream Bio

- Acquired UPB-101 from Astellas, a clinical-stage monoclonal antibody targeting TSLP Receptor. Clinically validated target in asthma
- The only mechanism of action that showed efficacy in low-Th2 asthma - follower of Amgen's market approved Tezspire®

29

ConnectRN

- Tech-enabled platform providing online community and work opportunities to healthcare professionals
- Rapid uptake in the long-term care market with additional business lines in home health care and hospital staffing
- Collaboration with Amedisys (now United Health) is developing well and has been the base for home health market expansion

23

NiKang Therapeutics

- Developing small molecules for oncology capitalizing on structure-based drug design. NKT2152 is a HIF2α inhibitor. Phase 1/2 dose escalation and expansion trials ongoing in advanced renal cell carcinoma (RCC) – possible expansion into other solid tumors
- Co. is working on leads against KRAS G12D (common genetic mutation in cancer)

Largest Public Equity Investments

196

Cathay Biotech

- Synthetic biology company: long-chain dicarboxylic acids / bio-based diamine 5 & bio-based polyamide / polyesteramide
- Profitable with revenues of CNY2.1 billion (\$310m) for 2023
- Significant collaboration (equity & supply contract) with China Merchants Group (CMG) - contract worth up to several hundred-million-dollar revenue

65

Harmony Biosciences

- Narcolepsy (with and without cataplexy)
- Wakix™ (Pitolisant) approved in the US and in the EU for narcolepsy (with or without cataplexy)
- Unlike other wake-promoting agents, Wakix is not scheduled as a DEA controlled substance

36

Argenx

- Drugs for autoimmune diseases – lead drug market approved VYVGART for the treatment of myasthenia gravis (gMG) – with potential indication expansion
- Novel antibody-based therapies, combining the diversity of the llama immune system with antibody engineering

30

Merus

- Bispecific antibody-based therapeutics for oncology. Lead pipeline product petosemtamab (LGR5xEGFR) in late-stage clinical development for r/m HNSCC as well as CRC.
- The rest of pipeline consists of zenocutuzumab (HER3xHER2) which is headed towards a BLA filing in NRG1+ NSCLC/PDAC, and MCLA-129 (EGFRxc-MET) which is in phase I/II development for EGFRm NSCLC.

28

Biohaven

- Various pipeline candidates in immunology, neuroscience and oncology. Lead drug BHV-7000 (Kv7 Channel Activator) for treatment of focal epilepsy.
- Large value creation potential lies in the development of bispecific pan-IgG degrader BHV-1300 – first human clinical data in Q2 2024 expected

26

Mineralys Therapeutics

- Targeted approach for the treatment of uncontrolled and hypertension and chronic kidney disease
- MLS-101 is an Aldosterone synthase inhibitor that showed significant effect size in a proof of concept trial
- Pivotal clinical trials for hypertension ongoing (readout 2024 & 2025); phase II - chronic kidney disease – start expected soon

M&As in the HBM Portfolio in 2023

ImmunoGen

- Acquired for \$10 billion by AbbVie
- The Immunogen-AbbVie deal was driven by the appeal of ImmunoGen's cancer therapy ELAHERE, which received accelerated FDA approval for the therapy of advanced ovarian cancer in November 2022, and looks set to obtain full approval in 2024.
- ELAHERE belongs to a new class of drugs called antibody-drug conjugates (ADCs). ADCs are fast-growing, innovative biopharmaceutical products that specifically target cancer cells, while protecting the healthy cells and thus improving treatment effectiveness.
- ELAHERE is a first-in-class ADC targeting folate receptor alpha (FRa), a cell-surface protein over-expressed in a number of epithelial tumors, including ovarian, endometrial, and non-small-cell lung cancers.

M&As in the HBM Portfolio in 2023

Prometheus

- Acquired for nearly \$11 billion by Merck & Co
- Therapeutic products for the treatment of immune-mediated diseases, inflammatory bowel disease (colitis ulcerosa, morbus crohn)
- Lead product candidate, PRA023, is a humanized IgG1 monoclonal antibody (mAb) that has been shown to block the tumor necrosis factor (TNF)

Chinook

- Acquired for over \$3 billion by Novartis
- Precision medicines for kidney diseases
- Lead product candidate, atrasentan, is a potent and selective endothelin A (ET_A) receptor antagonist
- Atrasentan is in phase III trials for the treatment of IgA nephropathy (IgAN) and proteinuric glomerular diseases

Case Studies HBM Portfolio Companies

Case Study Cathay Biotech

- Market cap: CNY 25.7 billion (CHF 3.2 billion), listed on Shanghai STAR Market since Aug 2020 (member of STAR 50 Index).
- Invested since May 2006: CNY 274 million (CHF 36 million) 7.1% ownership.
- Book value: CNY 1.6 billion (CHF 196 million) for 6.1% remaining ownership. One seventh of position sold during Sept to Dec 2023.

Source: Bloomberg and Company announcements; Financial figures as of 26 February 2024, all others as of 31 March 2024

Company Profile

- Cathay was founded in 2000 and engages in the research, development, production and sales of new bio-based materials based on synthetic biology and other technologies utilising bio-manufacturing technology.

Investment Rationale

- Cathay is the leading supplier of biological long-chain dicarboxylic acids ("LCDA"), fine chemical intermediates, which are used for nylon, polyester, adhesives and organic solvents. The Company sells its products to domestic and overseas markets.
- Cathay's proprietary technology allows production of pentamethylene diamine (PDA) from sustainable resources and provides downstream bio-based polyamide products, such as Cathay's high-performance textile material TERRYL[®] for broad applications in clothing, carpets, industrial yarns and other textile fields. Ecopent[®] is also a polyamide and can be used in the automotive and rail transit sectors, in electronics and electricals, in consumer and industrial goods, cable ties, film and others

Achievements during Investment Period

- Company achieved revenue CAGR of 8% (since 2017) with a net profit margin of ~24% on average. Company reported subdued results for 2022 & 2023 amid COVID-induced headwinds and rising raw material costs. Revenue and net income reached CNY 2114 million (-13.4% vs 2022) and CNY 367 million (-33.7% vs 2022) respectively.
- Lately a significant strategic collaboration with China Merchants Group (CMG), worth up to several hundred-million-dollar revenue, for Cathay's bio-based polyamide business, had been announced.
- Profit taking in Cathay Biotech with one seventh of the position has so far led to initial gains and cash.

Case Study Swixx BioPharma

- HBM was the first institutional investor in the company along founders and management.
- Net sales exceeded EUR 900 million in 2023
- Significant ownership of 26.3% in the company (investment of EUR 34.8 million currently valued at EUR 179.8 million).

Data as of 31 March 2024

Company Profile

- Swixx BioPharma is designed to take over business from biopharma, OTC and medical device multinationals' companies in those countries, or therapeutic areas in Central and Eastern Europe (CEE) and Russia, where such firms choose not to enter, or to exit

Investment Rationale

- Unique business model in fast growing economic area. Experienced management team, well known from former investment in PharmaSwiss
- Solid client and revenue base with potential for massive growth
- Further expansion and growth opportunities in other geographies
- Active contribution to business development through HBM network
- Unrivalled market access capabilities, in particular for higher priced prescription medicines

Achievements during Investment Period (since 2017)

- Strong revenue growth from EUR 24 million (in 2016) to EUR 1bn in 2023 – coupled with growing profitability (from 2023-24 targeting low double-digit EBITDA margin)
- Over 1'300 employees by the end of 2023
- Geographical presence now expanding into Central Asia, Belarus and Greece
- Newest investor Merieux Equity Partners purchased 20.2% of Swixx in fall 2021

Exit

- IPO or trade sale possible

Case Study

Mineralys

Therapeutics

- HBM was lead investor in February 2021 financing round, and is represented on the board
- The company pursues a targeted approach for the treatment of hypertension and related diseases such as chronic kidney disease
- MLS-101 is an aldosterone synthase inhibitor that showed significant and clinical meaningful effect size in a proof of concept phase II clinical trial
- Pivotal clinical trials ongoing for hypertension (data readout in 2024/2025)
- Chronic Kidney Disease (CKD) clinical trial to start in 2024

Company Profile

- Mineralys Therapeutics is a private, clinical-stage biopharmaceutical company developing novel therapies for the treatment of hypertension and related diseases such as chronic kidney disease

Investment Rationale

- Lack of innovation in the area of hypertension for many years
- Mode of action provides new and complementary treatment modality
- 2nd generation of molecules provide for better safety and enzyme selectivity
- Spin out from pharma company with pharma like pre-clinical data package

Achievements during Investment Period (since 2021)

- Hiring of clinical, regulatory and finance team
- Successful phase II clinical trial confirming mode of action, dose dependency, effect size and safety
- USD 118m Series B financing round by outstanding US / EU syndicate at 90% higher valuation compared to Series A
- Successful \$220m IPO on US NASDAQ in February 2023
- Pivotal clinical trials in Hypertension ongoing
- 120m private placement financing in in February 2024
- Sufficient funds to complete all ongoing clinical trials

Case Study Upstream Bio

- Invested: USD 22.5 million for 7.1% ownership
- Book value: USD 36.5 million
- HBM invested in December 2020 Series A financing round, and is represented on the board
- Closed \$200 million Series B financing round in June 2023 led by Enavate Sciences and Venrock, including new investors Bain Capital & Wellington
- The company pursues a targeted approach for the treatment of asthma and related inflammatory diseases
- UPB-101 is a monoclonal antibody targeting TSLP-Rc which sits at the top of the inflammatory cascade
- Two Phase 2 trials in asthma and chronic rhinosinusitis with nasal polyps ongoing (CRSwNP)

Company Profile

- Upstream Bio is a private, clinical-stage biopharmaceutical company developing novel therapies for the treatment of asthma and related diseases

Investment Rationale

- Inflammation and immunology spans a number of overlapping indications with a high unmet medical need and a large market potential, as was demonstrated by the recent M&A activity in the space
- Limited treatment options available for patients with non-allergic asthma in particular
- Clinically validated MoA, with a potential to differentiate from the competition on the frequency of treatment
- Spin out from a pharma company with comprehensive pre-clinical and an early clinical data package

Achievements during Investment Period (since 2020)

- Hiring of clinical, regulatory and finance team
- Successful Ph1b clinical trial in asthma patients for dose finding and safety de-risking
- Clinical data from early trials in patients suggest the possibility to dose once every 6 months. This will offer significant benefit to patients over the currently used treatment options which are administered either every 2 or every 4 weeks
- Ongoing Phase 2 trial in CRSwNP will provide a near term proof of concept in a larger patient population
- Ongoing Phase 2 trial in asthma with a potentially registrational design should deliver a significant value inflection step for the company

Case Study Arrivent Biopharma

- Invested: USD 12.0 million for 3.0% ownership (3.4% post IPO)
- Last post money valuation of USD 400 million before IPO – current market capitalization at USD 597 million
- HBM invested in March 2023 Series B extension financing round, and was represented on the board until the IPO
- The company pursues a targeted approach for the treatment of lung cancer
- Furmonertinib, an EGFR tyrosine kinase inhibitor, is already approved in China as a 1st line treatment for classic mutations EGFR mutated non-small cell lung cancer (NSCLC) patients
- Registrational trial ongoing in 1st line treatment for exon20 mutant EGFR mutated NSCLC patients

Company Profile

- Arrivent Bio is a public, clinical-stage biopharmaceutical company developing novel therapies for the treatment of lung cancer

Investment Rationale

- Exon 20 and atypical mutation EGFR mutated NSCLC patients comprise an estimated 22% of all EGFR mutated NSCLC. These patients are poorly served by available therapies which are plagued by poor tolerability, and inability to enter the brain where many metastases occur
- Having already gone through clinical development in China, furmonertinib’s safety and efficacy profile are well defined
- ORR of 69% in 30 treatment-naïve patients, speaks well for the efficacy of the drug in 1L Exon20 mutations, while CNS penetration and a beneficial side effect profile set furmonertinib apart from the competition

Achievements during Investment Period (since March 2023)

- US FDA breakthrough designation was obtained for 1L treatment of exon 20 mutated EGFR mutant NSCLC patients. The ongoing global Phase 3 study is to read out in 2025.
- The fully enrolled Phase 1b trial in 60 TKI-naïve PACC mutation EGFR mutated NSCLC patients is planned to read out later this year
- First patient was dosed in the combination trial of furmonertinib with a SHP-2 inhibitor for EGFR TKI experienced classical EGFR mutant NSCLC
- The company raised USD 175 million in an IPO end of January 2024.

Healthcare Market Outlook

The market is well positioned for further upside given attractive relative valuations, which could be complemented by an acceleration in M&A activity

Tailwinds

- A new cycle of major biotech innovation and transformative technologies
- Financials provide some level of downside protection
- Accommodative FDA regulatory body allowing rapid development and approval of drugs
- Later-stage M&A activity expected to continue as large pharma companies still need to fill their pipelines and have plenty of cash to spend
- Private financing activities proved resilient so far amid high level of dry powder available

Headwinds

- Macropolitical uncertainties
- Market-wide shift from growth to value
- Biotech weakness continues amid Fed's higher-for-longer narrative
- Generalist money inflow remains muted (eg. ETF flows)
- IPOs have come to a halt after record-breaking 2021; limited secondary offerings
- Concern on the sustainability of drug pricing across the globe

Expected Catalysts for 2024

Phase I		Phase II		Phase III		Approval
<p>Evorpcept: breast cancer, topline results phase Ib I-SPY trial evaluating evorpcept + Enhertu</p> <p>ALX ONCOLOGY</p>	<p>BI-1607: Phase I combination study with Trastuzumab</p> <p>BioInvent</p>	<p>Evorpcept: Results from full enrolment in phase II ASPEN-06 in gastric cancer in Q2 24</p> <p>ALX ONCOLOGY</p>	<p>Pitolisant: phase II POC study, myotonic dystrophy (DM1)</p> <p>H3 HARMONY BIOSCIENCES</p>	<p>Solriamfetol: Dopamine and norepinephrine reuptake inhibitor, (ADHD), phase III FOCUS trial topline data</p> <p>axsome</p>	<p>IO102-IO103: Phase III interim analysis, First Line Advanced Melanoma</p> <p>IO BIOTECH</p>	<p>Brukina: Tislelizumab 1L+2L esophageal cancer</p> <p>BeiGene</p>
<p>Furmonertinib: proof-of-concept data in PACC EGFRm, non-small cell lung cancer</p> <p>ARRIVENT</p>	<p>Zenocutuzumab (MCLA-128): NRG1+ lung & pancreatic data</p> <p>Merus</p>	<p>BLU-222, CDK2 inhibitor, HR+/HER2-metastatic breast cancer, phase I/II VELA trial</p> <p>blueprint</p>	<p>Briquilimab: Chronic spontaneous urticaria Report initial Phase 2 BEACON data</p> <p>JASPER THERAPEUTICS</p>	<p>AXS-05: NMDA receptor antagonist and sigma-1 agonist, Alzheimer's, phase III ADVANCE-2 trial topline data</p> <p>axsome</p>	<p>FILSPARI (sparsentan): IgA nephropathy, SPARTAN study data evaluating Filspari as a first-line therapy</p> <p>TRAVERE</p>	<p>Wakix (pitolisant): H3 receptor antagonist/ inverse agonist Pediatric narcolepsy PDUFA date</p> <p>H3 HARMONY BIOSCIENCES</p>
<p>Sonrotoclax: B-Cell malignancies, MM, MDS, AML, additional phase I data readouts</p> <p>BeiGene</p>	<p>TERN-701: CML, interim phase 1 readout from initial dose cohorts</p> <p>TERNS</p>	<p>Barzolvolimab (CDX-0159): CIndU, 12-week primary endpoint data from phase II</p> <p>Celldex Therapeutics</p>	<p>MCLA-158: 1L HNSCC Interim Pembrolizumab combo phase I/II data</p> <p>Merus</p>	<p>Taldefgrobep: Top-line data, spinal muscular atrophy</p> <p>biohaven</p>	<p>Zanidatamab (ZW25): phase III HERIZON-GEA-01 study in combination with chemotherapy and tislelizumab</p> <p>zymeworks</p>	<p>RP-L201: lentiviral gene therapy for LAD-I</p> <p>rocket</p>
<p>BTK CDAC: B-Cell malignancies, additional phase I data readouts</p> <p>BeiGene</p>	<p>TERN-601: Obesity (GLP-1R), top-line phase 1 data readout in high BMI subjects</p> <p>TERNS</p>	<p>CDX-0159: CSU, 52-week data from phase II</p> <p>Celldex Therapeutics</p>	<p>Lorundrostat: ADVANCE-HTN trial phase II uncontrolled and resistant hypertension in H2 24</p> <p>MINERALYS</p>	<p>Troriluzole: interim efficacy analysis, obsessive-compulsive disorder</p> <p>biohaven</p>		<p>RP-L102: lentiviral gene therapy for FA. BLA filing is expected soon, FDA approval ~mid '24</p> <p>rocket</p>
<p>BI-1808: Phase I combination study with Pembrolizumab</p> <p>BioInvent</p>	<p>GD2-SADA: Sarcoma, melanoma, SCLC phase I updated PK, tumor imaging data</p> <p>mAbs Therapeutics, Inc.</p>	<p>HexaBody-CD38: Phase I/II data for HexaBody vs subcut. Darzalex in hematological malignancies</p> <p>Genmab</p>	<p>C21: IPF final data in phase IIa</p> <p>vcore pharma</p>			

--- Private / ex-private companies
 -> separate colour for each company

Main Catalysts for HBM Public Portfolio Co's

Company	Therapeutic area	Phase	Description of catalyst
 ALX ONCOLOGY	Oncology	II	Results from full enrollment in phase II ASPEN-06 in gastric cancer
 ARRIVENT	Oncology	Ib	Furmonertinib: proof-of-concept data in PACC EGFRm, non-small cell lung cancer
 biohaven	Neurology	III	Troriluzole: interim efficacy analysis, obsessive-compulsive disorder
 biohaven	Neurology	III	Taldefgrobep: Top-line data, spinal muscular atrophy
 Genmab	Oncology	I/II	HexaBody-CD38: data for HexaBody vs subcut. Darzalex in hematological malignancies
 H3 HARMONY BIOSCIENCES	Neurology	II	POC study of pitolisant in myotonic dystrophy (DM1)
 H3 HARMONY BIOSCIENCES	Neurology	III	TEMPO phase III study of pitolisant in Prader-Willi Syndrome
 OBIOTECH	Oncology	III	IO102-IO103: Phase III interim analysis, First Line Advanced Melanoma
 Merus	Oncology	I	Zenocutuzumab (MCLA-128): NRG1+ lung & pancreatic data
 Merus	Oncology	I/II	MCLA-158 (Petosemtamab): 1L HNSCC Interim Pembrolizumab combo data
 MINERALYS	Hypertension	II	Lorundrostat: ADVANCE-HTN trial phase II uncontrolled and resistant hypertension
 rocket pharma	Gene therapy	Approval	RP-L201, lentiviral gene therapy for LAD-I (Leukocyte Adhesion Deficiency)
 rocket pharma	Gene therapy	Approval	RP-L102, lentiviral gene therapy for Fanconi Anemia (FA)
 TRAVERE THERAPEUTICS	Nephropathy	Approval	FILSPARI (sparsentan): approval in IgAN (immunoglobulin A nephropathy)
 -mAbs Therapeutics, Inc.	Oncology	I	GD2-SADA: Sarcoma, melanoma, SCLC phase I updated PK, tumor imaging data
 zymeworks	Oncology	III	Zanidatamab (ZW25): 1L HER2+ GEA
 zymeworks	Oncology	Approval	Zanidatamab: Approval in 2L HER2+ BTC (biliary tract cancer)

Reasons to Invest

1. Investment in the innovation and the growth of the healthcare sector
2. Unique investment approach in private and emerging listed companies
3. Active contribution to performance
4. Compelling exit markets (M&A and IPO)
5. Attractive distribution policy

- Access to a well-diversified portfolio of private and listed healthcare companies with value increasing potential
- Experienced investment team with specialized sector expertise and proven track record
- Competitive edge over other investment vehicles focusing exclusively on private or listed investments
- Global orientation with focus on the US, but increasing allocation in emerging markets such as China and India
- Closed-end structure allows optimum exploitation of the value-increasing potential of healthcare companies with daily liquidity
- Lower correlation to public market portfolios thanks to the substantial private capital allocation
- Potential to achieve long-term capital growth with an attractive distribution policy (3-5% yield target)
- Solid balance sheet with low debt and strong capital
- Quarterly reporting with high level of transparency and direct access to the HBM portfolio management team

Withholding tax-exempt distribution yield of 3-5% p.a. (based on the share price) from par value repayment

Board of Directors

Hans Peter Hasler (2009)
Chairman

Swiss Federal Commercial Diploma. Various international management positions at Wyeth Pharmaceuticals, Biogen and Elan Corporation (1993 to 2013)

Mario G. Giuliani (2012)
Member

Economist. Executive positions and directorships at Giuliani SpA, Recordati SpA, and Nogra Group SA

Dr Elaine V. Jones (2021)
Member

Ph.D. in Microbiology. Formerly various management positions at Pfizer Ventures, EuclidSR Partners and GlaxoSmithKline

Dr Rudolf Lanz (2003)
Member

Economist and doctorate in law. Former Partner of The Corporate Finance Group and Head of Corporate Finance of Ernst & Young Switzerland (1980-2009)

Dr Stella X. Xu (2020)
Member

PhD in Immunology, BSc in Biophysics and Physiology. Managing Director of Quan Capital Management. Formerly various management positions at Roche and McKinsey & Co.

Management

Dr Andreas Wicki (2001)
CEO

Doctorate in chemistry and biochemistry.

Prior experiences as Chief Executive of several pharmaceutical companies (1988 to 2001), investment and venture capital advisor (1993 to 2001)

Erwin Troxler (2005)
CFO

Economist and Swiss Certified Accountant.

Prior experience as auditor at PwC (1996 to 2002) and account manager at Julius Baer Family Office (2002 to 2005)

Jean-Marc Lesieur (2001)
Managing Director HBM Cayman

Associate of the Chartered Institute of Bankers (ACIB trustee), a member of the Society of Trust and Estate Practitioners (STEP) and a Notary Public in the Cayman Islands. He was educated in the Cayman Islands and England.

Former director for Vontobel Private Equity Management Ltd

Dr Matthias Fehr (2002)
Head Private Equity

MSc and PhD in chemistry from ETH Zurich.

Former senior sell-side analyst at Lombard Odier for biotech and medical technology industries; former scientist at the Swiss Federal Institute of Technology

Dr Ivo Staijen (2003)
Head Public Equity

PhD in biotechnology from ETH Zurich and MSc in chemistry from the University of Groningen.

Previously senior biotechnology analyst at Bank Sarasin and department head at MDS Pharma Services

Private Equity Team

Dr Alexander Asam, MBA (2007)
Investment Advisor

MBA from ASTON Business School, Birmingham and MSc and PhD in chemistry from University of Heidelberg.

Former managing director and partner at Deutsche Venture Capital / Deutsche Bank. Various positions at Hoechst, Aventis and LION Bioscience

Dr Priyanka Belawat (2007)
Investment Advisor

PhD in molecular biology and genetics from the University of Zurich and a post-doc at HKUST.

Over 18 years of experience in venture and private equity investing in healthcare space and life sciences research

Dr Emil Bujak, CFA (2015)
Advisor to HBM Partners

PhD and MSc in Medicinal and Industrial Pharmaceutical Sciences from ETH Zurich. Chartered Financial Analyst (CFA) since 2019.

Prior experience as a registered pharmacist and in antibody technology research at Philogen

Dr Michael Buschle (2017)
Advisor to HBM Partners

PhD from University of London. Research at St. Jude's Children's Research Hospital, Boehringer Ingelheim-owned Institute of Molecular Pathology, Vienna.

Co-founder of Intercell with successful IPO, CSO of Glenmark Pharma

Dr Romain Kooger (2020)
Investment Advisor

PhD and postdoc in biophysics and microbiology at ETH Zurich. BSc and MSc in biochemistry from the university of Geneva with an emphasis on chemistry and neurosciences.

Year-long research internships at Leiden University and Nanjing University

Dr Chandra P. Leo, MBA (2007)
Investment Advisor

Doctor of Medicine from Freie Universität Berlin (Charité), MAS in Medicines Development from University of Basel, MBA with distinction from INSEAD.

Former postdoc at Stanford University, physician at University Hospital Leipzig and principal at Wellington Partners

Dr Asun Monfort (2020)
Investment Advisor

PhD in pharmaceutical development of innovative medicines from University of Navarra. Postdoc at the Stem Cell Institute in the University of Cambridge and postdoc at the Institute for Molecular Health Sciences at ETH.

Previously senior scientist at ETH

Dr Thomas Thaler (2006)
Investment Advisor Private & Public Equity

PhD in life sciences and MSc in biochemistry and MBA from ETH Zurich.

Previously senior equity analyst at Bank Julius Baer and in senior management positions with Sulzer Medica, Schneider and Boston Scientific

Raphael Weibel (2018)
Head Risk Management

Bachelor in Business and Economics and a Bachelor in Geography from Zurich University

Prior positions in auditing at KPMG and banking at Reichmuth & Co. Privatbank. Has previously worked in medical regulatory affairs

Public Equity Team

Steve Chen, CFA (2019)
Investment Advisor (Hong Kong)

MBA from Wharton Business School, MSc in Biochemistry and Molecular Biology from Georgetown and BSc from Nankai University.

Previously managed trading portfolio for Barclays (NY) and Huatais' HK subsidiary and was PM for a large closed-end listed fund in China

Thomas Heimann (2010)
Head Operations & Investment Solutions

MSc and BSc in Banking & Finance from the Lucerne University of Applied Sciences.

Previously in investment analysis and valuation and in client advisory at a Swiss bank

Gavin MacGregor (2017)
Investment Advisor

1st Class BSc in Biomedical Sciences, University of Manchester and a Chartered Management Accountant (CIMA).

Previously senior global healthcare analyst at Martin Currie Investment Management, European pharma analyst at Credit Suisse and Lehman Brothers

Miranda Guo (2020)
Investment Advisor (Hong Kong)

MSc in Biomedical Engineering from the Chinese University of HongKong.

Previously PE investment manager at LEPU Medical Technology and investment analyst at BGI Genomics

Michael Jasulavic (2012)
Advisor (USA)

MSc in Medical Science from MCP/Hahnemann University

Previously biotechnology analyst at Traxis Partners, Sivik Global Healthcare and Jefferies Asset Management

Miles Schofield (2007)
Trading & Execution

Bachelors of Science (Hons) degree from the Open University UK.

Previously in US Equities Middle Office activities at Salomon Smith Barney and Citigroup

Mirjam Heeb (2019)
Investment Advisor

MSc in Molecular Biology from the University of Basel and McGill University, Montreal.

Previously senior portfolio manager of GAM Health Innovation Fund, senior manager with Vifor Pharma, analyst and portfolio manager at Bellevue Group

Ny Ken (2004)
Investment Control

Bachelor in business administration from Zurich University of Applied Sciences.

Previously in administrative functions at HBM Partners AG

Dr Shirin Schneeberger (2023)
Investment Advisor

PhD in Medical Neuroscience from the University Hospital Charité Berlin and MSc and BSc from ETH Zurich.

Over 7 years of experience in biomedical research and life science investments. One year research internship at Harvard Medical School.
